

BACOLOR AT A GLANCE

Date Founded: 1576
Founder: Guillermo Manabat
Province: Pampanga
No. of Barangays: 21
Urban Barangays: ➤ Cabambangan

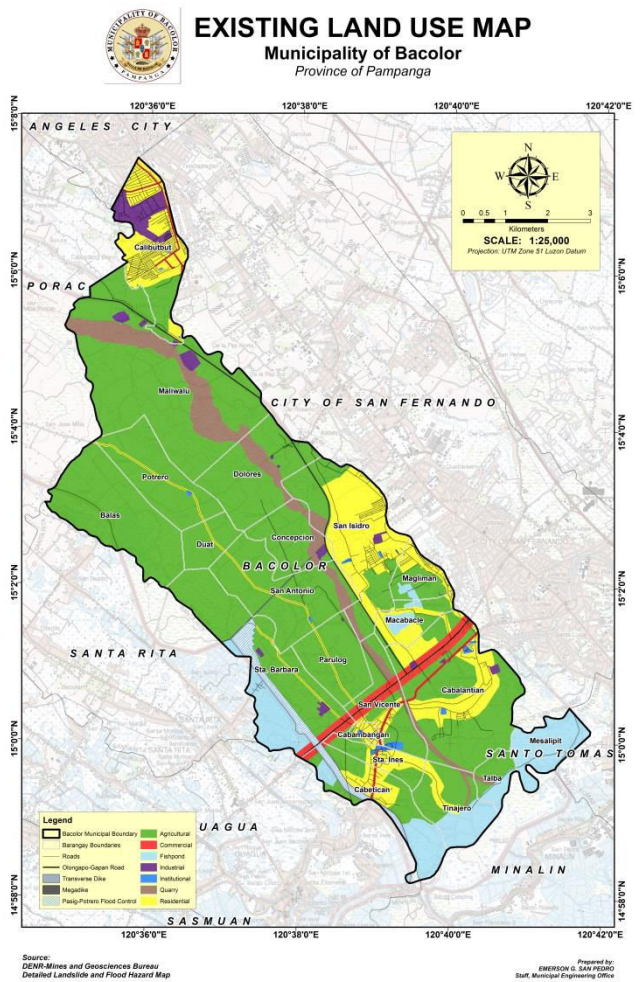

(Poblacion/Business District)
 ➤ Calibutbut
 (Industrial Area /
 Ecozone)
 ➤ San Vicente
 ➤ Sta. Ines
 ➤ Cabalantian
 ➤ Cabetican

Income Classification: Third Class

❖ Geographic Location and Physical Characteristics

Villa de Bacolor is located at the heart of Pampanga and is bounded on the north by Porac and Angeles City, approximately six kilometers away in the east by the province's Capital City, San Fernando, west by Sta. Rita and Guagua and south, by Minalin and Sto.Tomas. As to political subdivision, it is part of the Third District of Pampanga Province together with the municipalities of Arayat, Mexico, Sta. Ana and the City of San Fernando. It serves as a linkage in going to the western part of the Province and the Region as well via the Olongapo-Gapan National Road. In terms of size, it ranks 9th among the 19 municipalities. It is located approximately 6 kilometers from the city proper of San Fernando, the provincial capital of Pampanga, the nearest major urban center and the regional seat of government in Central Luzon. Bacolor is a third class municipality that caters to 21 barangays. Bacolor has a total land area of 4,827 hectares (48.27 square kilometers). Land area is composed of 1,800 hectares agricultural, 281.62 hectares residential 43 hectares are rivers, roads, utilities, idle, open and marsh land. The terrain of the town is generally flat composing of several islets isolating four inland barangays from its mainland. It is virtually enclosed by a diking system built by the National Government after the Mt. Pinatubo eruptions to protect neighboring towns from lahar flows. The Mega Dike encloses the Pasig-Potrero River, the Gugu Creek and nine barangays namely: Concepcion, Dolores, Duat, Maliwalu, Parulog, Potrero, San Antonio, and Sta. Barbara within the Mega Dike is the Transverse Dike (dike within the dike) built on the northern portion to lessen the impact of lahar flows in the lower portion of the municipality. Likewise, it will protect the Olongapo-San Fernando-Gapan Road, the only major road linking the provinces of Bataan and Zambales to other provinces in Luzon. On the lower end portion is the Tail Dike located in the boundaries of Sto. Tomas and Minalin enclosing eight barangays: Cabalantian, Cabambangan, San Vicente, Sta. Ines, Cabetican, Talba, Tinajero and Mesalipit. Other bodies of water that traverse Bacolor include Gugu Creek, Potrero Creek, San Antonio Creek and Banlic Creek. Prior to the lahar devastations, Bacolor is basically an agricultural area. Its land belongs to non-forest areas and has a flat terrain and a downward sloping area which was found out to be the result of lahar flows from the Mt. Pinatubo. Some portions are rich source of fine gravel and sand which are good raw materials for construction activities. Today, Bacolor's terrain is higher by 6.5 or more meters due to lahar that buried major portions of the municipality. It is traversed on the west portion by the Pasig-Potrero River where millions of tons of lahar flowed burying 18 of the 21 barangays in the town.

❖ **Total Land Area** - 7,110 hectares

Based on updated data the municipality's agricultural land is estimated at 5,331.197 hectares. Productive area consists about 2,453.50 hectares broken down as follows: Cropland/Corn/High Value crops: 1,255.20 has; Inland Fishpond: 198 has; Sugarcane area is estimated at 983 hectares and Orchard area: 215.30 hectares. As of date, residential and commercial areas have started to be redeveloped for ideal settlements and business purposes. About 120.3914 hectares of agricultural lands have been reclassified in 2005-2015 for residential and commercial purposes. There still remain a total of 2,757.37 hectares buried under lahar deposits and waiting for rehabilitation.

Soil Classification: Angeles Fine Sand

Land Classification: Non –Forest with flat terrain and a downward sloping area

Land Area by Barangay: Total- 7,710 hectares

Barangay	Area (Hectares)
Balas	283.05
Cabalantian	991.09
Cabambangan	45.9
